The 5th March, 1951.

S. P. JAIN,

for Registrar General, India

NATIONAL SAVINGS CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the Small-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

REMARKS

The figures of births and deaths shown in this statement for week ending the 10th February, 1951, relate to 156 towns with an estimated population of 19,385 thousands. The total number of towns is 234 and their population is 29,017 thousands. Thus 67% of the total number of towns representing 67% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 12,696 and 7,327 representing birth and death rates of 34.1 and 19.7 per thousand of population respectively.

(A) States (Parts A and C).—The data here relate to 138 towns with an estimated population of 16,837 thousands. Information about Assam, Bihar, Madhya Pradesh and West Bengal could not be included. The total number of towns is 202 and their population is 25,187 thousands. Thus 68% of the total number of towns representing 67% of the total population is covered. The numbers of births and deaths recorded in these towns were 11,414 and 6,611

representing birth and death rates of 35.3 and 20.4 per thousand of population respectively. The table at the end gives the position by States.

The towns of Nellore and Tanjore in Madras recorded high death rates of 82.3 and 54.9 per thousand of population respectively. The high death rate in Nellore was mainly due to death from fevers and cholera and in Tanjore it was due to deaths from cholera.

(B) States (Part B).—The data here relate to 18 towns with an estimated population of 2,548 thousands. The total number of towns is 32 and their population is 3,830 thousands. Thus 56% of the total number of towns representing 67% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,382 and 716 representing birth and death rates of 26.2 and 14.6 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
